ADI, part of Honeywell Automation and Control Solutions, just launched a new re-designed website that features easier navigation and enhanced functionality. This new design allows customers to go to the Shop Online page or any other informational category from any page on the site, with one click of the mouse.

A "Featured Product" section was added on the home page with a link for more detailed product-specific information. An online PDF version of the current

quarterly product catalog is another new addition. The table of contents navigation provides an extensive category and sub-category listing, allowing products to be found faster than with

the printed version. Pages can easily be printed from this document, which is especially helpful when you need a page for reference and don't want to tear it out of the book. ADI's electronic line card has been updated to include linked websites to hundreds of industry manufacturers as an added expediency for customers.

New links to industry trade shows have been provided with ADI booth numbers, along with event listings to find out what's happening at local ADI branches. Lastly, a comprehensive ADI Expo page was re-designed, showing dates, times, locations and complete details of the seminar programs including content information and CEU credits.

Circle 152

The screenshot shows the ADI website homepage. At the top, there's a navigation bar with links for Home, About Us, Locations, News/Events, ADI Expo, Reference, Search, and Contact Us. Below this is a 'Secure Site Log In' button. The main content area is titled 'Welcome To ADI' and features a central graphic with the text 'North America's Number 1 Wholesale Distributor Of Security And Low Voltage Products'. To the right, there's a 'Shop Online' section with a 'Click Here For eCommerce' button. Below that, there's a 'Featured Product' section for 'The Online 4VC'. The footer contains various industry association logos including NIBFA, CANARA, AFA, CCA, and SIA.
